DAVID TRICK

Design Technologist 23407 54th Ave West Mountlake Terrace, Washington (Greater Seattle Area)
520.904.4503 | trickyeng@gmail.com |LinkedIn: linkedin.com/in/davidtrick/

PROFESSIONAL SUMMARY

Innovative Design Technologist with 8+ years at Amazon Web Services specializing in user experience design, front-end development, and developing AI-powered automation. Proven track record of launching global-scale control systems, creating comprehensive design systems, and bridging design and engineering disciplines. Expert in translating complex technical requirements into intuitive, user-friendly interfaces that delight customers and drive operational excellence.

Core Competencies: User Experience Design, Design Systems, Figma, CloudScape Design System, TypeScript, React, AI/ML Integration, Front-End Development, Prototyping, 3D Modeling

PROFESSIONAL EXPERIENCE

Design Technologist

Amazon Web Services (AWS) | March 2021 - Present (5 years) | Seattle/Denver

- Designed and launched global Data Center Controls Systems for both Mechanical and Electrical operations, creating unified user experience that scaled across AWS worldwide data center infrastructure, impacting thousands of operators globally
- Created comprehensive design systems and UI components in Figma using CloudScape Design System, establishing scalable patterns and reusable components for consistent user experiences across multiple product teams
- Developed AI-powered automation tools including custom agents for automated page auditing against design standards, leveraging Amazon Cline and Quick Suite to improve design consistency, code quality, and accelerate development workflows
- Built data visualization dashboards and metrics pages enabling cross-functional Data Center Operations teams to monitor and analyze Controls data in real-time, improving operational decision-making and system performance
- Designed and implemented customer-facing features that enhanced user satisfaction and streamlined workflows for data center operators, creating new ways to delight customers through thoughtful UX design
- Engineered full-stack features using TypeScript and React for front-end development, integrated with GraphQL APIs, Java, and Python back-end services to deliver production-grade controls software
- Collaborated with engineering, operations, and product teams to translate complex technical requirements into intuitive, user-friendly interfaces, serving as bridge between design and engineering disciplines
- Pioneered AI-assisted design and development workflows by creating custom agents for development and review processes, automating standards compliance and accelerating team productivity

- Drove design and front-end development best practices including component architecture, design systems governance, accessibility standards, and user-centered design methodologies

Technical Stack: Figma, CloudScape Design System, TypeScript, React, JavaScript, GraphQL, Java, Python, Amazon Q, Quick Suite

Controls Design Engineer

Amazon Web Services (AWS) | April 2017 - March 2021 (4 years) | Greater Seattle Area

- Established and maintained global graphical standards for Data Center Controls infrastructure across multiple international vendors for Building Management Systems (BMS) and Electrical Power Monitoring Systems (EPMS)
- Promoted to L5 in December 2018, recognizing technical leadership and significant impact on global controls standardization and design excellence
- Collaborated with worldwide vendor partners to ensure consistent, high-quality visual standards across AWS global data center footprint spanning multiple continents
- Developed comprehensive design documentation and guidelines that scaled across diverse geographic regions and vendor implementations, ensuring brand consistency and usability
- Bridged design and engineering disciplines to create intuitive, functional control system interfaces that balanced aesthetic appeal with operational requirements
- Led design reviews and provided expertise on control system user interface architecture and visual design standards

Skills: 3D Modeling, User Experience Design, Controls Systems, BMS, EPMS, Global Standards Development, Visual Design

Curriculum Developer and Instructor

Blaze Education, Inc. | January 2017 - March 2017 (3 months) | Redmond, Washington

- Developed curriculum standards and created course materials for Game Development and 3D Printing classes
- Instructed students on 3D modeling, design thinking, and rapid prototyping techniques
- Established educational standards that balanced technical skills with creative problem-solving

Design Engineer

UW Hyperloop | March 2016 - August 2016 (6 months) | Greater Seattle Area

- Designed test cell apparatus for magnetic levitation thrust vector measurement using strain gauges and precision instrumentation for sustainable high-speed transportation system
- Created detailed CAD models and engineering drawings for test bench components
- Collaborated with multidisciplinary team on conceptual design for Hyperloop transportation system

Freelance Designer

Syncopated Design | May 2010 - September 2014 (4 years 5 months)

- Provided comprehensive design services including logo design and branding, typography, journal and book design and layout, website creation and maintenance, animation, and user interface/experience

design
- Managed client relationships and delivered projects across diverse industries
- Developed strong portfolio demonstrating versatility in visual communications and digital design

Teaching Assistant & Lab Assistant

University of Washington | September 2014 - December 2015 (1 year 4 months) | University of Washington, ME Department

Reader/Grader:

- Functioned as Lab TA for Mechanical Engineering courses, assigning team design exercises, explaining requirements, and answering student questions
- Graded homework and labs, proctored exams

Lab Assistant:

- Assisted Lab Managers (Composites, Machine Shop, Learning Labs) with equipment setup, inventory management, and facility maintenance
- Setup hardware and software installation of lab computers
- Trained on lab equipment and safety procedures

EDUCATION

Bachelor of Science in Mechanical Engineering

University of Washington | 2014 - 2016 | GPA: 3.42

- **Capstone Project:** EcoCar - Machining, SolidWorks drawings, manufacturing of connective components (brackets, mounts, gears, cradles, crossbars, frames)
- **Independent Research:** UW Hyperloop - Test Bench Design for magnetic levitation system
- **Activities:** ASME Student Chapter Member, ASHRAE Student Member
- **Coursework:** 3D Printing (ME 498), Advanced Energy Conversion (ME 430)

Honors:

- Roy & Irene Grossman Memorial Scholarship for Scholastic Excellence (September 2015)
- Roy C. Fellows Endowed Scholarship for Scholastic Excellence (September 2015)

Bachelor of Fine Arts in Visual Communications - Graphic Design

University of Arizona | 2002 - 2008 | GPA: 3.84 | *Magna Cum Laude*

- Additional emphasis in Motion Graphics
- Member of IEEE

TECHNICAL SKILLS

Design & UX: Figma, CloudScape Design System, User Experience Design, Design Systems, Prototyping, Wireframing, Rapid Prototyping, Visual Design, Interaction Design, User Research, Accessibility Design

3D Modeling & CAD: SolidWorks, Revit, 3D Printing, Additive Manufacturing, CAD/CAM, Technical Drawing

Front-End Development: TypeScript, React, JavaScript, HTML5, CSS3, Component Design, Front-End Architecture, State Management, Responsive Design

AI & Automation: Amazon Q, Quick Suite, Custom Agent Development, AI-Powered Auditing, Machine Learning Integration, Workflow Automation

Back-End & APIs: GraphQL, Java, Python, RESTful APIs, Full-Stack Development

Tools & Platforms: Git, Ignition Systems, Adobe Creative Suite (Photoshop, Illustrator, InDesign), Microsoft Loop, HSMExpress, HSMWorks

---

CERTIFICATIONS

- **Figma Essential Training: The Basics** | LinkedIn Learning | April 2022
- **Revit: MEP Families** | LinkedIn Learning | August 2021

PROJECTS

AI-Powered Page Auditing Agent | *2024 - Present*

- Developed custom AI agent for automated auditing of web pages against design and coding standards
- Leveraged Amazon Q and Quick Suite to improve code quality and ensure design consistency across development teams
- Automated standards compliance checking, reducing manual review time and improving overall quality

3D Printed Hovercraft Prototype | *August 2015 - Present*

- Designed and iterated on 3D-printed hovercraft prototype through multiple versions (V1, V2, V2.5)
- Proved viability of complex vehicle manufacturing through additive manufacturing
- Demonstrated rapid prototyping skills and iterative design methodology

---

LANGUAGES

- **English:** Native proficiency
- **French:** Limited working proficiency

VOLUNTEER EXPERIENCE

Security Officer | Baha'i World Centre | *May 2003 - May 2004 (1 year 1 month)*

Haifa and Akka, Israel

- Maintained security presence and coordinated with local guards to ensure safety of visitors and facilities

- Collaborated with 750+ volunteers from diverse international backgrounds in multi-cultural environment
- Performed gate, building, and grounds checks; communicated with dispatch about issues
- Volunteered in additional departments including gardening, facilities, and visitor guidance

---

PROFESSIONAL RECOMMENDATIONS

Nate Sniadecki | Professor at University of Washington | *November 2016*

"David is a talented mechanical engineer. He is responsible, hard-working, and a team-player. His passion for engineering learning goes beyond the classroom."
